- **Bursaries/Scholarships:**

ISABS aims to reach a diverse set of learners from all sections of society. We are committed to make this learning opportunity available to those working in under resourced Non-profit organizations or community based organizations and movements. A few bursaries will be available to participants who are working in such organizations and/or are constrained with resources.

Participants will be required to submit an application for bursaries to the Dean Social Development (Dean SD) – Ms. Manisha Jayaraman on or before 10th August 2022 at dean.sd@isabs.org

The bursary applications will be reviewed by the bursaries committee and applicants will receive an e-mail on the status of their application by 20th August 2022.

For queries related to the bursary process, please send an e-mail to dean.sd@isabs.org

ISABS T-Group labs offer an opportunity, to learn handling human processes that are the basis of our actions and behaviours, in a group setting. You will learn, to unravel the mysteries of human behaviour, by observing yourself and others, thereby understanding various emotional, psychological and group dynamics, in a way that helps you make conscious choices of who you want to be! In our experience, attending these labs will help you grow and live your life more fully - both, personally and professionally.

Typically in a Human Process Laboratory, a group of around 10-12 participants work together along with facilitator/s to learn about human processes, and in the process discover more about themselves, their strengths, their styles, their interpersonal and group interactions, how they perceive others, and are perceived by others. The group uses the 'here and now' experience to derive this learning, using each other as a resource. The facilitator/s help create a climate for such learning. With personal growth comes the ability to understand the group, and the organization. It helps in developing the ability to interact in a more authentic, open and spontaneous fashion, the ability to recognize one's feelings, accept the vulnerability of sharing them and take the risk of becoming fully engaged with another person and/or a group of people.

ISABS programmes focus on building competency in personal effectiveness and making it available for organizational and societal growth and development. Participants in ISABS labs are likely to become more sensitive to their and others' feelings, needs and behaviours as well as understand their own and others' behaviour more clearly.

Learning Focus	Likely Individual Benefits	Likely Organizational Benefits
Self-Awareness	The individual becomes aware of her/his emotions, strengths and weaknesses.	S/he accurately assesses herself/himself and develops self-confidence to perform organisational tasks.
Leading Self	The individual develops the capacity to effectively manage her/his motives and regulate their behaviours.	The payoff for the organisation is an individual potentially with self-control, trustworthiness, conscientiousness, initiative, ability to adapt & effectively influence others
Group Process and/or Social awareness	The individual develops the capacity to understand what others say and feel and why they feel and act as they do.	This results in improved empathy, organisational awareness and service orientation
Inter-personal / Group process skills	This capacity enables the individual to get desired results from others and reach personal goals.	As a result, the individual is able to develop others, provide leadership, influence, communicate effectively, becomes a change agent, able to manage conflicts, build bonds, teamwork and collaboration.

About BLHP- Basic Lab on Human Process
